BACKGROUND SUMMARY

Experience in petroleum engineering that involved management, drilling operations, completions/workovers, production engineering, economics/acquisitions, and reservoir.

WORK HISTORY

Rosetta Resources (7/2013-Present)

Drilling Advisor South Texas. Supervise operations; prepare procedures and AFE's for Eagle Ford horizontal drilling rigs. Mentor engineering staff.

BHP-Billiton (2/2012-7/2013)

Senior drilling engineer Eagle Ford Shale
Supervise operations and engineers; prepare procedures and AFE's for Eagle Ford horizontal drilling rigs.

Goodrich Petroleum Corp. (2007-2012)

Drilling Engineer/Superintendent for East Texas-North Louisiana/South Texas Eagle Ford
Supervise operations; prepare procedures and AFE's for Eagle Ford horizontal drilling rigs.
Supervise operations; prepare procedures and AFE's for Haynesville/Cotton Valley/Travis Peak wells

Cymraec Resources Inc (2006-2007) Houston, Texas

Vice-President of Operations
Supervise and approve operations related to drilling and production. Serve on prospect committee to review and approve prospects before drilling. Approve drilling and production procedures and authorizations for expenditures.

Consulting (1995-2006)

BP America, Houston, TX

Prepare written procedures for decommissioning of offshore wells and platforms.

Essex Gas Storage Services, Sugar Land, TX

Prepare AFE's and well designs for horizontal gas storage wells in Kentucky, Oklahoma, and Louisiana. Prepare AFE's and designs for high volume SWD wells. Supervise well site work for slick line and coil tubing units.

Cypress E & P Co. / Energy Corporation of America, Houston and Sugar Land, TX

Well site supervision and office consultation preparing procedures and AFE's for drilling, workovers and completion work. On site supervision of drilling, coil tubing units, slick line, snubbing units and frac jobs on deep Texas Wilcox wells.

Goldking Operating, Houston, TX

Well site supervision for workovers and recompletions involving coil tubing, slickline, wireline, and workover rigs on shore and inland waters.

EEX Corporation, Houston, TX

Well site supervision for plug and abandonment on land and inland waters.

Coastal Oil and Gas, Houston, TX

Production and completions engineer, responsible for preparing procedures and cost estimates for well stimulation, recompletions, completions, and plug and abandonments for offshore and onshore wells.

Schlumberger Integrated Project Management, Anaco, Venezuela

Production and completions engineer responsible for project studies dealing with enhanced oil recovery, stimulations, and recompletions.

Triton Engineering, Ojeda, Venezuela

Completion engineer/Drilling engineer responsible for overseeing preparation of detailed completion program for all Alliance wells and providing wellsite support for critical completion operations in Lake Maricabo.

Pennzoil Exploration and Production Co. (1975 – 1995) Houston, TX, Shreveport, LA, and Tinsley, MS

Asset Team Leader, North Western Gulf of Mexico (1994-1995)

Prepared profit plan, Monitored asset base and performance relative to profit plan. Instigated activity on idle assets with drilling program and farmouts. Primary contact with partners on exploration issues.

Operations Team Leader, Arkla-Tex Area (1992-1994)

Made workover and recompletion recommendations.

Reduced lifting cost from \$11/bbl to \$6/bbl in one field. Increased production from 6MMCF/day to 20MMCF/day in one field.

Petroleum Engineer Advisor (1990-1992)

Evaluations for sale and acquisition of properties. Workover and development that caused a well to be drilled that produced 300 BOPD. Served on the “due diligence” team for Chevron properties acquisition.

District Engineer (1983-1990)

Responsible for reservoir and production engineering in a five state area (TX, LA, AR, MS, and AL). Supervised Engineering and technical staff. Approved workover proposals, drilling proposals, budget preparations, and reserve determinations. Implemented purchases of interest in company operated fields. Represented Pennzoil in hearings with Louisiana Department of Conservation and Mississippi Oil and Gas Board.

Area Drilling and Production Superintendent (1980-1983)

Responsible for drilling and production operations in Mississippi. Supervised the installation of CO2 tertiary recovery project.

Petroleum Engineer (1975-1980)

Drilling and workover supervision including casing designs, completion procedures and cost estimates. Recommendations for pumping and injection equipment for waterfloods. Well site engineer for 22000 ft. deep test well in MS and for 2 Smackover tests in FL.

EDUCATION

B. S. Petroleum Engineering, Mississippi State University
