Professional Experience

Over 15 plus years of diverse domestic oilfield experience Including Mud logging, Drilling Fluids Engineer, Directional Drilling, And Well Site Supervisor

Oilfield Experience

Well Site Supervisor, Gulfport Energy	1/2014-6/2015
Drill horizontal development gas wells in the Utica Shale depths from 13,000 to 22,500, KOP @ 7,500 build Curve and hold 90 degrees to TD. Experienced with Air Drilling operations on vertical sections and OBM applications from KOP to TD. Maintain a safe work environment, ensure all personnel on location follow company policies, SOBM applications, maintain safe and cost efficient operation, coring application	
Drilling Fluids Engineer Rapid Drilling Fluids	10/2012-1/2014
Designed and engineered drilling fluids programs in West Texas Working with Synthetic Base Drilling Fluid in Ohio Utica Formation	
Independent Drilling Fluids Consultant, B.E.G Mud Services	8/2011 – 9/2012
Overseen Drilling Fluids in South LA and Central Texas, Austin Chalk formations Managed drilling Fluids in South Texas Eagle Ford formations Ran offsite mud plant including building, scheduling and maintaining all types of drilling fluids	
Directional Driller, Allis-Chalmers	4/2010 - 8/2011
Building and assembly of Directional Motors, Adjusting for Operational changes Involved in well planning, Drill string design and logistics Drilled multilaterals, sidekicks, and directional wells in Eagle-Ford Formation	
Drilling Fluids Engineer, Anchor Drilling Fluids	6/2007 – 4/2010
Field Supervisor over entire Northeast Region Including PA, NY, WV, OH <i>Managed 18 Mud engineers, Multiple Well-Sites, 24 Hours Technical Support, As well as Customer Support and staffing Logistics</i> <i>Provide Training for new hires and beginning Fluid Engineers</i>	
Independent Drilling Fluids Engineer, MudTech Services, Inc.	09/2005 – 16/2008
<i>Consultant for Halliburton/ Bariod in TX, LA, AR Haynesville Shale</i> <i>Contracted on days off for Baker Hughes in PA Marcellus Shale</i>	
Drilling Fluids Engineer, Spirit	4/2003 – 09/2005
<i>Drilling Fluids Operations in East Texas/ West LA Various formations</i> <i>Throughout East Texas, La and Ark</i>	
Drilling Fluids Engineer, Newpark	6/2001 – 04/2003
<i>Drilling Fluid Service for West Texas Permian Basin</i> <i>Maintaining drilling fluids in and wellbore integrity in extreme</i> <i>Loss circulation and High Pressure Situations</i>	
Mud Logger Selman well logging	10/1999-6/2001
Formation identifying, wellbore gas monitor, sample collection	

■ **Industry Training:**

■ **Petroleum Education Services Inc. Well Control BOP Supervisor Level Cert # N166415**

■ **Petro Skills : Directional, Horizontal, Multilateral Drilling**

Strong foundation in Directional, Horizontal, and Multilateral drilling operation

Specific problems associated with directional/horizontal drilling such as torque, drag, hole cleaning, logging and drill string component design.
